

NexusNovus I&D incorporation

From now on, NexusNovus Trading and Consultancy activities are organized in two distinct legal entities. NexusNovus Import & Distribution Services will focus on importing western products of strongly growing industries such as Food, Healthcare and Fire & Safety. This step will foster the development of the well-maintained distribution network which has already been a major advantage of the company over the last 4 years.

Together with NexusNovus Tech Consultancy Services, consulting European SMEs eager to enter the Indian market, the foundation is now perfect for future success stories made by NexusNovus.

Victor Eveleens, director of NexusNovus I&D and minority shareholder is happy about the recent news: *“Creating a new separate entity for Import & Distribution within NexusNovus allows us to create an even stronger trading network for us and our customers. With an entire team, completely dedicated to cater to the needs of our European trading partners to make their products available in the dynamic Indian market place, we can rise far above the expectations of both the NexusNovus Group and our Clients!”*
